1.	<p><u>Coronet Revegetation</u></p> <p>Briana Pringle presented a PowerPoint on Coronet Forest Revegetation and responded to questions.</p> <p>There was discussion on revegetation occurring in three stages, where the first stage involves building a fence around the site to ensure pests do not eat the plants. There was further discussion on goat and deer pest control, roading assessment, tracks for mountain bikes, walking and horse riding, as well as car parking and toilet facilities.</p> <p>There was also discussion on maintenance after the forest is established. Staff commented on soils being prone to wind, frost and landslips. It was also explained that the land moves even when planted, which will impact maintenance costs.</p>		

The workshop concluded at 11.36am
